File Detection Test of
Malicious Software,
October 2015

The File Detection Test assesses the **ability of antivirus programs to detect malicious files on a system**. Whilst the test only assesses one antimalware feature of the programs, this feature is important because it can identify malware attacks from sources other than the Internet, and detect malicious files already present on the system.

The Security Report 2016,
February 2016

ESET is the only security program within the entire test that detected each one of the 7179 tested current malware. ESET's products are designed with **built-in protection** from the very beginning, and this test result proves that.

VB100 Comparative
Review on Windows 7 Pro
64 Bit, August 2015

According to a 2015 IT security survey by AV-Comparatives, low **impact on system performance is important** for 64% of participants. ESET achieves excellent performance in a way that doesn't impact its customers' experience.

Consumer Security
Performance Benchmarks,
November 2015

Faster operation and lower resource consumption mean **better performance**. ESET is faster and lighter than AVG in many scenarios.

*Lower is better

Feature	ESET Cyber Security Pro	AVG AntiVirus for Mac	Why it matters
Firewall	●	○	A firewall is able to control network traffic allowed to access programs on the firewalled computer. The firewall also provides some level of intrusion detection, allowing the software to terminate or block connectivity where it suspects an intrusion is being attempted.
Mail Protection	●	○	Email protection provides control of email communication received through the POP3 and IMAP protocols to block potential threats.
Removable Media Blocking	●	○	Malicious insiders frequently use USB drives to quickly steal data or compromise systems, often without organizations being aware of the problem until it's too late. As a result, Device Control is now a critical component of data protection strategies for enterprises.
Cloud Scanning	●	○	The ESET Cloud Malware Protection System is one of several technologies based on ESET's LiveGrid® cloud system. Unknown, potentially malicious applications and other possible threats are monitored and submitted to the ESET cloud via the ESET LiveGrid® Feedback System.
Scheduled On-Demand Scan	●	○	A customizable scan scheduler lets the administrator schedule scans according to his/her preferences – for example, when employees are normally out of the office.

Many new malware samples appear every day, which is why it is important that antivirus products not only provide new updates as frequently and as quickly as possible, but also that they are able to detect such threats in advance using generic/heuristic techniques and behavioral detection measures.

■ ESET ■ AVG

"Thanks to this outstanding performance, ESET finishes with the highest final score of all products, and a very well-deserved VBSpam+ award."

Virus Bulletin
VBSpam Comparative Review, November 2015

"ESET have continuously participated in our tests for a decade and we are happy to see ongoing commitment to product improvement."

AV-Comparatives
Anniversary Report, July 2015

"ESET achieved a 100 percent malware detection rate in both test segments – real-time test and reference set."

AV-TEST
The Best Android Apps – 25 System Watchdogs in an Endurance Test, December 2015

"We feel the Windows protection software is exceptionally well designed, with important information and functions easily accessible, but unauthorized access prevented."

AV-Comparatives
IT Security Products for Small Business, October 2015

ESET earns 'Top Rated' award from AV-Comparatives
In addition to being named a *Top Rated Product*, ESET Smart Security 9 won the *Silver Award* in the False Positives category and the *Bronze Award* for Proactive Protection. The report highlights the improved graphical user interface (GUI) in ESET Smart Security 9, as well as its "excellent and comprehensive documentation".
